Perfect Total Care for the Beauty and Health of the Skin

Over time, skin begins to change and age. As a result of collagen breakdown, slower cell-turnover and moisture loss, signs of aging may appear. Dull complexion, dilated pores, fine lines, wrinkles, loss of elasticity become more visible.

Fainlise Regenerating Collagen Products combine Procollagen and famous regenerating and line minimising ingredient, Matrixyl, to hydrate and nourish skin and to activate skin cell metabolism, firming and smoothing the skin.

Formulated with high-quality hydrolysed marine collagen extracted from deep ocean plants and enzymes, which are free from pesticide pollution and diseases, Regenerating Collagen Products are safe and reliable to use.

Upon application, the pure and concentrated hydrolysed collagen penetrates deep into the skin, quickly moisturises and repairs damaged and ageing skin, restores and rebuilds skin's suppleness. With continuous use, pores are refined, fine lines are smoothed away, and dull complexion is brightened and clarified.
